

Eco-Safe Fab-Soft

Eco-friendly high performance blend of quality biodegradable components that impart a soft feel to garments while helping to rinse away residual detergent while significantly saving on all associated costs

Description:

Eco-Safe Fab-Soft is a biodegradable and eco-friendly liquid fabric softener and rinse aid which is a proprietary blend of cationic and non-ionic surfactants that impart a soft feel to garments while helping to rinse away any residual detergents that may still be clinging to fabrics after the initial washing process.

Features & Benefits:

Eco-Safe Fab-Soft liquid fabric softener is easy to use and is very economical when compared with traditional products and the traditional method of dispensing product while retaining very high-performance characteristics. Eco-Safe Fab-Soft restores that "newly delivered" feel to fabric furniture covers,

after washing clothes, seats and sofas. Similarly, eco-friendly Eco-Safe Fab-Soft gives a wonderful feel when used in the rinse water after washing fabric car seats and vehicle carpets, leaving a pleasant fragrance in the vehicle.

Concentrate with Accu-Dose:

Eco-Safe Fab-Soft is uniquely formulated in super concentrate version which saves tremendously not only on finished product cost by not blending it with mostly water, but it saves very significantly on storage, shipping, transport and logistics costs. To reduce weight and pack size on average 95% water content is removed in Fab-Soft concentrate and 80% water content for Eco-Safe Fab-Wash concentrate.

It is packaged with a unique 1L Accu-Dose dosing bottle which neatly and accurately dispenses in micro increments from 5ml to 50ml for the ultimate in dispensing control, which completely avoids spillage and wastage. The conventional way of dispensing involves a few inaccurate and unmeasured bottle caps, which can quickly unnecessarily double or even triple product usage. Once an

amount is measured out with the Accu-Dose system it is physically impossible to over dispense the required amount.

Recommended Dosing Levels:

Use 10 ml per kg of laundry. Increase slightly if necessary.

Use Eco-Safe Fab-Soft with the final rinse water in manual washing or the rinse cycle in automatic washing machines.

Shelf Life & Storage:

This product may be stored for up to one year in its original packaging, and under ambient conditions. Store in a cool, dry place out of direct

Physical Properties:

Colour:	Clear / Blue
PH at 25%	9 - 10
Odour:	Lavender
Appearance:	Slightly Viscous
Dissolvable:	In Water Only
Flashpoint:	N/A

First Aid:

Seek medical attention
Wash with water
