

Eco-Safe Mop-Shine

Special blend of eco-friendly quality ingredients for ease of use applying with a mop and bucket to maintain a top shine while extending the life of floor polish treatments.

Description:

Eco-Safe Mop-Shine is an environmentally friendly floor maintenance product which is a specially formulated floor polishing product made from the finest ingredient waxes, polymers and resins. It can simply be applied with a mop and bucket without the need for specialized machinery.

Features & Benefits:

Eco-Safe Mop-Shine is easy to apply, needing only a floor mop and bucket to apply.

Eco-Safe Mop-Shine imparts a great gloss quality film that protects floor tiles from scuffing and protects people from slipping. The wear life of certain finishes can be easily doubled when regularly applying Eco-Safe Mop-Shine to the floor to enhance its appearance.

Eco-Safe Mop-Shine will help to reduce marking from shoes and other rubber of plastic articles that

may be dragged across the floor from time to time.

Applications:

Environmentally friendly and biodegradable Eco-Safe Mop-Shine can be applied to any floor, from masonry to various plastic finishes, including PVC and PVA resin flooring, either for tiles or for roll-out section floors.

Mop-Shine can also be applied to stone and wooden floors such as parquet flooring as well as certain terracotta finishes.

Mop-Shine can be applied in supermarkets, kitchens, hostels, hospitals, homes and hotels with equal confidence for a superior finish.

Use & Dilutions:

GLAZING AND SHINING: Eco-Safe Mop-Shine is best applied to a clean floor after a thorough rinse to get the most satisfactory results. If Eco-Safe Mop & Shine is applied without thorough cleaning and rinsing then there is always the possibility that the gloss may be dulled as some of the polish will curdle rather than coalesce properly.

Floors treated with Eco-Friendly Mop & Shine may be buffed using a

mechanical burnisher, supplementing the shine with Eco-Safe Mop & Shine for best results.

After 20 or so applications, it will be necessary to strip off all the polish using Eco-Safe Floor Stripper (either Ammoniated or Non-Ammoniated dependent on the environment), and then to re-apply Eco-Safe Mop & Shine after rinsing.

Shelf Life & Storage:

Eco-Safe Mop-Shine may be stored for up to one year in the original packaging, and under ambient conditions. Store between 10°C - 38°C.

For Best Results:

Use with Eco-Safe's full range of bio-enzymatic products which benefit each other as you use them. Save money and improve performance while reaping multiple benefits compared to traditional chemicals. Avoid using disinfectants and harsh chemicals, these kill our beneficial micro-organisms and harm the environment.

Physical Properties:

Physical State: Liquid
Appearance: Milky white
% Solids Content: As stated
